

# Electrical Panel Upgrade Rebate

## Upgrade your electrical panel and save money!

- **Lower energy bills:** A new electrical panel can reduce your monthly energy cost by 10-30%.
- **Futureproofing:** Upgrading to a higher amperage panel helps ensure that your electrical system can accommodate future electrical demands as your needs evolve, possibly saving you from costly upgrades.
- **Home marketability:** Potential buyers are often attracted to properties with updated electrical infrastructure, making it an asset in the real estate market.

## Rebates

### Residential Only

- **Up to \$250** for panel upgrades receiving Inflation Reduction Act (IRA) tax credits or state administered programs.

### Residential and Commercial

- **Up to \$1,000** for panel upgrades connecting approved technologies for direct load control programs. Examples: CoolSavings A/C cycling, electric water heating bill credit.
- **Up to \$2,000** for panel upgrades installing off peak service and connecting approved technologies for load control programs. Examples: dual fuel, thermal storage, electric water heating, electric vehicle charging.
